Fees & Services

APPOINTMENTS

*Save $20 on exam fees when you schedule online

Initial Consultation — $385

A comprehensive ophthalmic evaluation for your pet's first visit with us. Includes slit-lamp biomicroscopy, indirect ophthalmoscopy, tonometry, Schirmer tear testing, fluorescin dye application and interpretation, and neuro-ophthalmic evaluation

Medical Progress Evaluation — $175

A follow-up evaluation to monitor your pet's condition after our initial consultation. Includes slit-lamp biomicroscopy, indirect ophthalmoscopy, and neuro-ophthalmic evaluation. Additional testing like tonometry, Schirmer tear testing, fluorescin dye application and interpretation, not included

Urgent Care Examination — $550

For new or existing patients, we prioritize your pet's care on short-notice by performing evaluation during lunch or after-hours

DIAGNOSTICS

Schirmer Tear Testing — $60

Evaluation of tear production

Tonometry — $80

Measurement of intraocular pressure

Fluorescein Dye Application — $60

May be used to assess corneal injuries, tear film, and nasolacrimal duct function

Nasolacrimal Duct Flushing — $150

Diagnostic and therapeutic flushing of the nasolacrimal system to assess or establish patency

Ocular Ultrasonography — $300

May be used to assess intraocular structures in cases of severe opacifications. Commonly used to screen for intraocular tumors and retinal detachments

EYELID

Surgical Eyelid Mass Removal — $3250

Wedge or pentagonal excision of mass involving less than 30% of eyelid. Performed under general anesthesia. Histopathology included

Partial Eyelid Mass Removal & Cryotherapy — $1450

Debulking and cryotherapy of eyelid mass. Usually performed under sedation. *Select cases only*

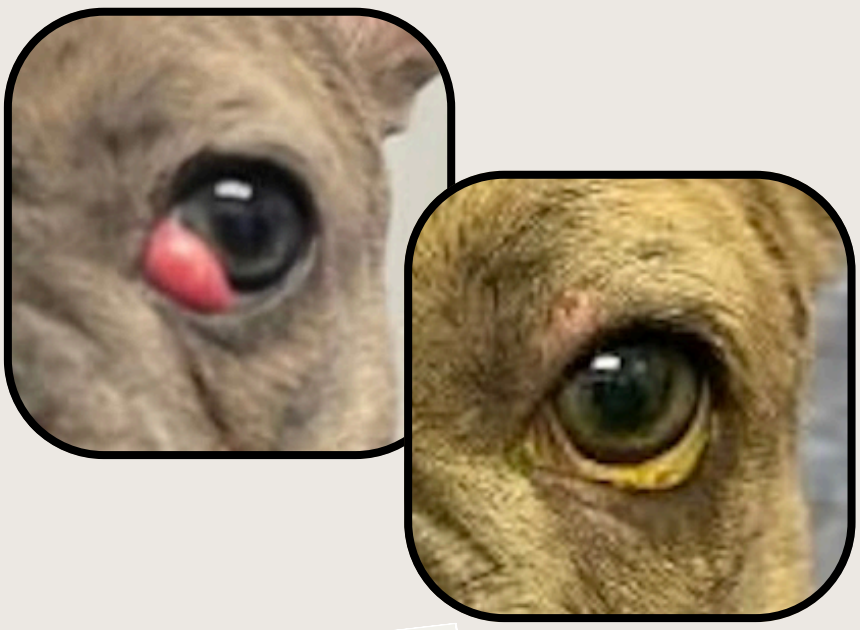

Entropion Correction — $3500-4000

Permanent correction of eyelid position and/or length to properly align eyelid margins. Includes one or both eyes

Cryotherapy for Distichia — $2500-3500

Destruction of distichia hair follicles to prevent or relieve ocular surface irritation from offending hairs. Includes 2-4 eyelids

THIRD EYELID

Cherry Eye Correction — $3500

Permanent repositioning of prolapsed third eyelid gland. May include combination of techniques to maximize success rate

Everted Cartilage Correction — $3000

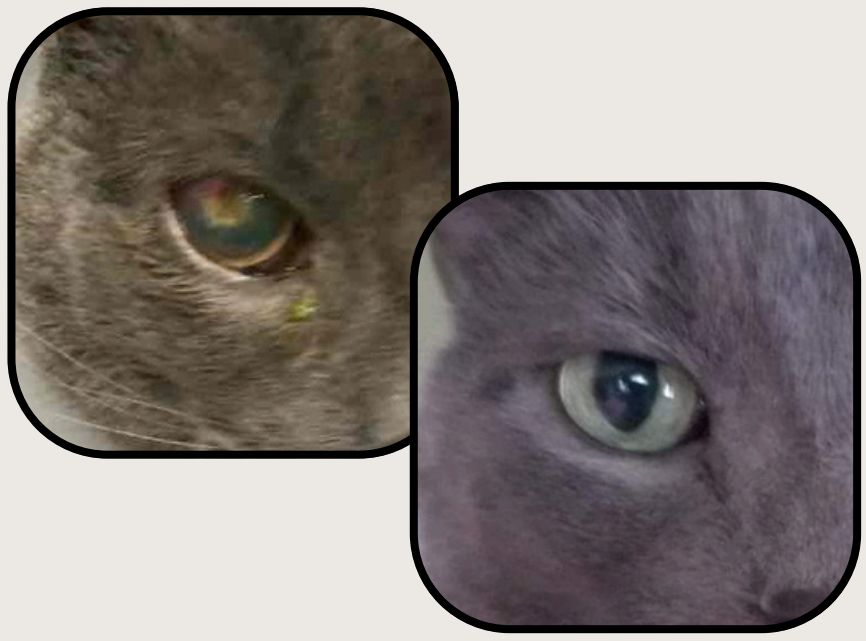

Resection of kinked third eyelid cartilage with re-apposition and/or straightening of third eyelid

Third Eyelid Removal — $3000

Removal of third eyelid, most commonly in cases of tumors

CORNEA

Grid Keratotomy/Diamond Burr Polishing — $1200

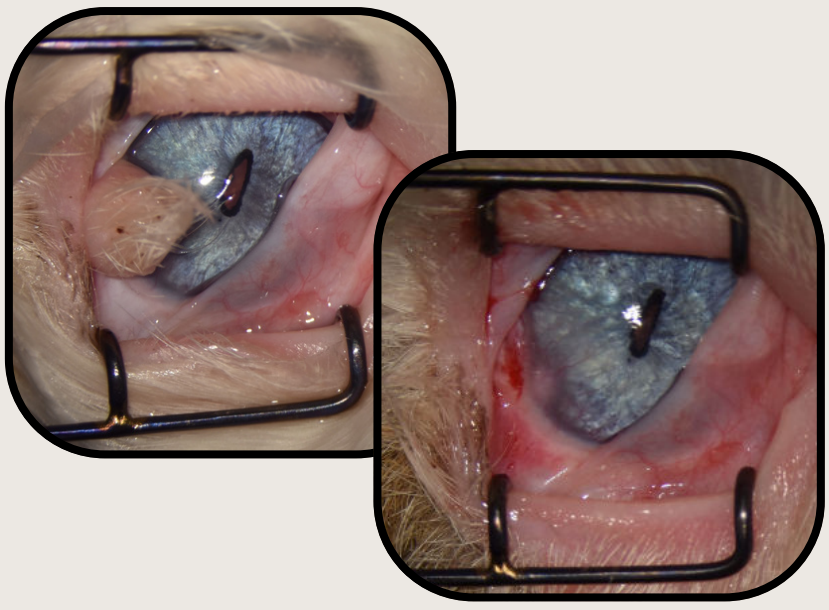

Superficial debridment of non-healing corneal ulcerations to facilitate timely healing. 85% success within 2 weeks. May require sedation

Lamellar Keratectomy — $3200

Resection of superficial layer(s) of cornea in cases of corneal sequestra, non-healing corneal ulcers, or dermoid

Corneal Reconstruction — $3900

Tissue grafting of the corneal surface in cases of deep ulcers, infection, and/or perforation

LENS

Cataract Extraction (unilateral) — $4500

Modern phacoemulsification technique to remove cataract and place artifical lens. Includes 2 post-operative evaluations

Cataract Extraction (bilateral) — $6000-6750

Modern phacoemulsification technique to remove cataract and place artifical lens. Includes 2 post-operative evaluations

Intracapsular Lens Extraction — $4000

Removal of luxated lens, which is often an emergency. Includes 2 post-operative evaluations

GLOBE

Enucleation

$3500

Surgical eye removal. Often reserved as a last resort for blind and potentially painful eyes. Common reasons include refractory glaucoma, intraocular tumors, and large corneal perforations

Evisceration with Intrascleral Silicone Prosthesis

$3750

Replacement of the intraocular contents with a dark silicone ball to allow patients with refractory glaucoma to retain the outer structure of their eye

Ciliary Body Chemical Ablation

$1200

Intraocular injection that permanently reduces intraocular pressure in 75% of dogs with refractory primary glaucoma. May be considered in some cases of secondary glaucoma

Proptosis Replacement

$3000

Surgical replacement of traumatic proptosis of the eye
